

Recalling Data from a Data View

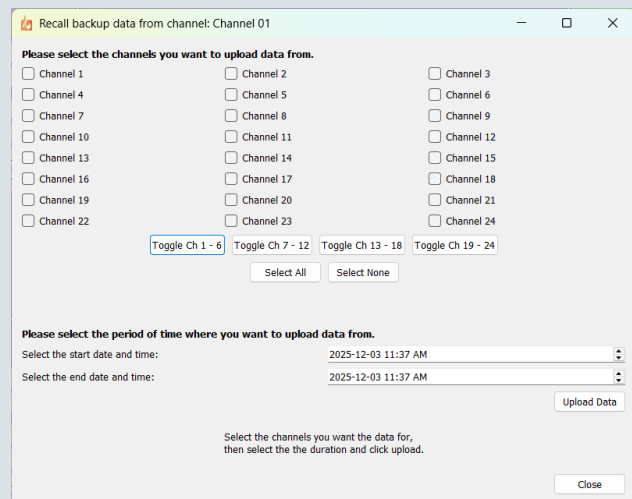

1. Open the Data View software on your computer and make sure the Data View has connection to your computer.

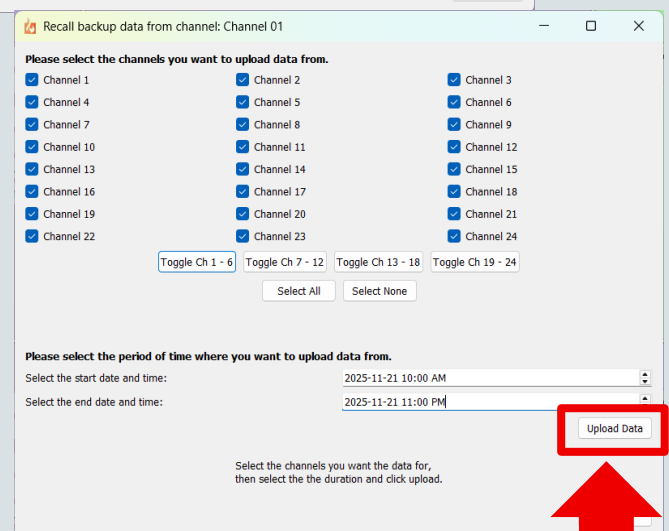

2. Click on the “Get backup report” button at the top of the screen.

3. A pop-up screen will appear. Here you can choose which channels and which date range you want to pull data from.

When you are happy with your channel and date selection, click the “Upload Data” button at the bottom right.

Recalling Data from a Data View

4. This process may take several minutes depending on how large of a time frame you have selected. Once finished, the data will be available on your computer. Re-open the report tool and you will be able to access this data and generate a report.
